

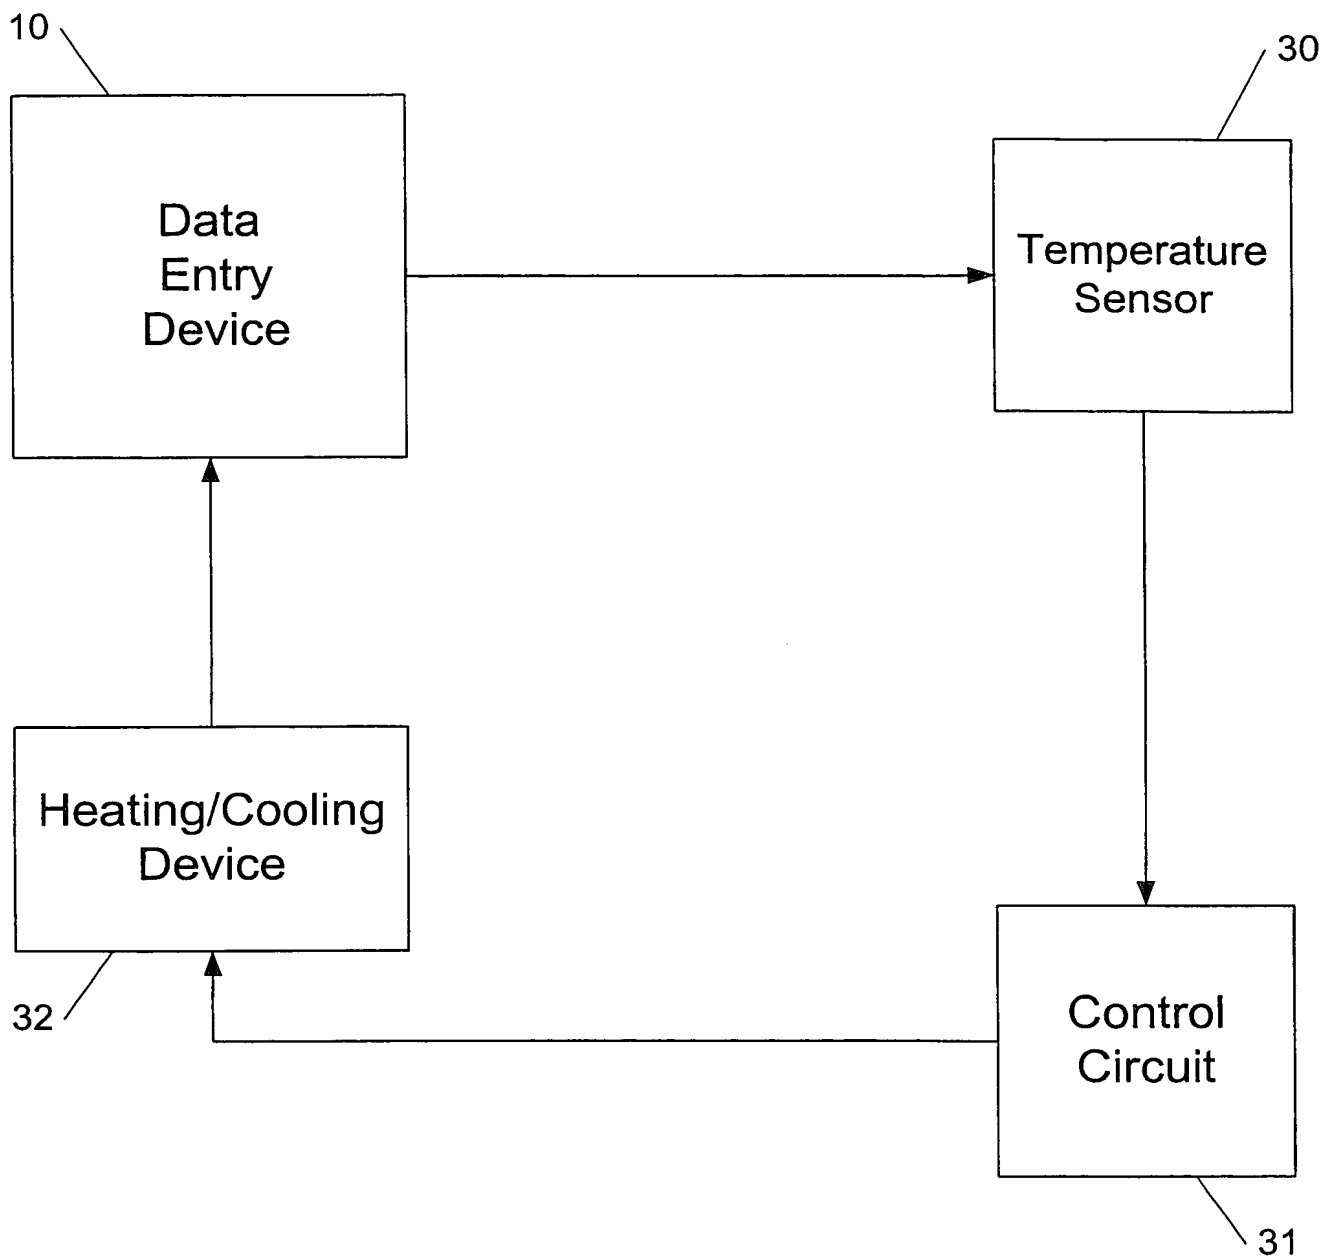

**FIG. 1**

**FIG. 2**

FIG. 3 is a block diagram of a system for controlling a heating/cooling device. The system includes a data entry device 10, a temperature sensor 30, a control circuit 31, and a heating/cooling device 32. The data entry device 10 is connected to the temperature sensor 30. The temperature sensor 30 is connected to the control circuit 31. The control circuit 31 is connected to the heating/cooling device 32. The heating/cooling device 32 is connected to the data entry device 10.
